

Innovative solutions for a better customer experience.

#athenawise

Athena Federal Solutions is a Woman-Owned Small Business (WOSB) providing technology solutions and digital services to government agencies. Our user centric approach to solution design and development ensures customer experience is at the heart of everything we do!

We combine technology industry experience with mission-focused delivery to create innovative digital experiences that thrive in the modern world.

We Deliver Services that Delight our Clients

Digital Transformation and System Modernization

- **Customer Experience and Requirements:** Support requirements through user stories, screen mock-ups and data and workflow diagrams—all with the customer at center stage
- **Modern Architectures:** Provide design and delivery solutions using microservice architectures that integrate workflow, template generation, signature, reporting and document management
- **AI & Intelligent Automation:** Support development and adoption of generative artificial intelligence (Gen AI) and automation solutions to reduce administrative burden

Strategy, Agile Management, and Communications

- **Digital Strategy:** Develop strategy and vision for digital transformation and modernization efforts
- **Program Management:** Provide disciplined management approach using baseline metrics to plan, track, and manage modernization activities
- **Agile Product Management:** Deliver iterative, flexible approach to developing products that focus on continuous feedback and delivering value in small, incremental sprints
- **IT Communications:** Provide tailored communication strategies using various modalities (e.g., newsletters, social media, web/mobile) to improve customer adoption

Clients

We've worked to modernize the federal government in many agencies, including:

Providing digital transformation support to **Federal Aviation Administration** mission critical System of Airports Reporting (SOAR) grants system

Delivering strategic IT communication support to the **National Science Foundation's** Office of the CIO grants and research programs

Enabling employees across the **US Department of Agriculture** with improved accessibility to technology as part of the Target Center

Leadership

Nadia Smith is a senior executive and nationally recognized leader in federal digital health transformation, with more than two decades of experience advancing innovation across government healthcare systems. She most recently served as Acting Chief Digital Health Officer for the Veterans Health Administration (VHA), where she led enterprise digital health strategy, scaling telehealth, immersive technologies, AI-enabled solutions, and patient engagement platforms to improve access, experience, and outcomes for millions of Veterans. Nadia has also guided large-scale modernization initiatives supporting the Electronic Health Record Modernization (EHRM) effort and other mission-critical digital transformation programs across the Department of Veterans Affairs.

As Founder and CEO of Athena Federal Solutions, Nadia brings deep expertise in systems modernization, clinical informatics, digital strategy, and federal acquisition. She has held senior leadership roles at firms including Capgemini Government Solutions, Atlas Research, and Booz Allen Hamilton, delivering high-impact solutions to federal health agencies. With an MBA in Management Information Systems from Johns Hopkins University and a BBA in International Business from The George Washington University, Nadia combines strategic vision, technical fluency, and mission-driven leadership to help federal clients accelerate innovation and deliver measurable results.
